Construction Temporary Surface Protection

The background image shows a construction site at sunset. Several workers in hard hats are silhouetted against a bright orange and yellow sky. They are working on a structure with a complex network of steel beams and scaffolding. In the foreground, there are vertical rebar structures. The overall scene is one of active construction during the 'golden hour' of the day.

From first fix to final handover, protecting finished surfaces is critical, but it shouldn't slow you down. Protectapeel is a spray-on, peel-off protective coating designed for modern construction, delivering robust surface protection in a fraction of the time of traditional methods. By cutting installation time, minimising damage, and eliminating costly remedial works, Protectapeel helps contractors build faster, smarter, and with confidence.

- Spray Application - Just 49 seconds per m²
- No Measuring Or Cutting Required
- Easily Adheres To Shaped & Curved Surfaces
- BS 476 Pt 7 Fire Rated
- Low VOC & VOC Free Coatings Available
- Air Tight Protection With No Adhesion Loss
- Long Term & Short Term Protection
- Easily Removed By Hand Peeling
- Recyclable

Protectapeel is applied in as little as 49 seconds per m² by airless spray gun, dramatically reducing labour costs and time on site. It's ideal for both flat and curved surfaces, with no measuring, cutting, or sizing required — unlike traditional protective film or board. Simply spray and protect.

Protectapeel provides long-lasting surface protection for up to 24 months, both internally and externally, with no loss of adhesion. It protects surfaces from scratching, mortar, weathering, dirt, overspray, weld spatter, and more, keeping finishes pristine throughout the build process.

When the job's done, Protectapeel is easily removed by hand peeling in one sheet and can be condensed into a small ball. Just give us a call and we'll collect the used Protectapeel free of charge, returning it to our manufacturing facility for recycling.

“PROTECTAPEEL WAS INCREDIBLY STRAIGHTFORWARD TO USE AND SAVED US A SIGNIFICANT AMOUNT OF TIME. IT ALLOWED US TO COVER MUCH LARGER AREAS COMPARED TO OTHER PRODUCTS WE’VE USED. THE APPLICATION AND REMOVAL PROCESSES WERE QUICK AND HASSLE-FREE, AND THE CUSTOMER SERVICE WE RECEIVED WAS EXCELLENT.”

IVAN KOLEV

SITE MANAGER | BULGROUP

We offer free, no-obligation demonstrations to showcase Protectapeel's performance and benefits in real on-site conditions. Our team will demonstrate how quickly and easily Protectapeel can be applied, as well as the level of protection it provides across a wide range of surfaces.

Should you choose to purchase Protectapeel, we also offer free application training for your team. This ensures operatives are confident using the product, apply it efficiently, and achieve consistent, high-quality results from day one.

**" I HAVE FOUND
PROTECTAPEEL EASY TO
USE AND EASY TO PEEL OFF
WHICH IS GREAT FOR US.
I FIND IT A MUCH BETTER
PRODUCT THAN OTHER STUFF
WE HAVE USED IN THE PAST "**

STEVE JAMES
SITE MANAGER | RAVENWORTH

Protectapeel isn't just for glass. It's widely used to protect a variety of surfaces across construction sites, including work surfaces, sanitary basins, wall tiles, floor tiles, and more. Its spray-on application allows it to conform to both flat and complex shapes, providing reliable protection for finished surfaces that need to be kept safe during construction and fit-out phases.

- Fast Application
- No Measuring or Cutting to Size
- Air Tight Protection No Adhesion Loss
- Internal & External Use
- BS 476 Part 7 Fire Rated
- Up To 24 Months Protection
- Ideal For Flat & Curved Surfaces
- Fast Removal & Recyclable
- Reduce Repairs & Replacements

Because Protectapeel can be applied to so many surface types, it simplifies site logistics. A single protection solution can be used by multiple trades, reducing the need to store and manage different protection materials across the site.

Protectapeel was used during the construction of The Burj Khalifa, the world's tallest building, to protect high-value glass facade throughout the build process from general site damage.

The coating was easily peeled away, revealing flawless surfaces and helping deliver the exceptional finish expected of one of the most recognisable buildings in the world.

Protectapeel was trusted to protect one of the world's most iconic skyscrapers, the tallest building in China The Shanghai Tower.

Applied to the glass façade, Protectapeel protected surfaces from scratching, paint overspray, and other damage. Once complete, the coating was simply peeled away, revealing pristine finishes worthy of a global architectural icon.

Protectapeel was used to protect 40,000m² of the captivating curtain walling on the 51-storey integrated development CapitaSpring in Singapore.

The iconic glass façade has redefined Singapore's city skyline, which was protected during construction from damage such as scratching, mortar, dust and debris by Protectapeel.

Over 30 years of
UK manufacture

Trusted worldwide

Protectapeel Floordefend is a breathable, composite floor protection system that temporarily bonds to polished or smooth concrete. Seamless, UV and weather resistant, it protects concrete floors from the moment the slab is poured through to project handover.

Installed before framing begins, Floordefend is ideal for decorative and polished concrete where damage is not an option. It prevents scratches, gouges, stains, and markings caused by foot traffic, equipment, and active trades—keeping floors looking exactly as specified.

Floordefend is a glue-down adhesive fabric that blocks debris, spills, abrasion, oil, water, acids, welding splatter, impact, and weathering. UV-stable for up to 24 months and certified antimicrobial and antifungal, it allows crews to work directly on top. Drying tack-free in around 2 hours and curing in 12 hours for heavy traffic, it installs quickly with just one or two people no special training, no reapplication, and no waste.

With decades of experience and a proven track record across construction projects worldwide, Protectapeel offers a smarter way to protect surfaces without compromise. Manufactured in the UK since 1992, trusted by contractors, and designed with sustainability in mind, Protectapeel delivers reliable protection that saves time, reduces waste, and keeps finishes flawless. When it comes to protecting your build from start to finish, choose a solution that works as hard as you do.
